

EX03 FIGHTING RIFLE

BY SONS OF LIBERTY GUN WORKS

EX03 FIGHTING RIFLE

The Sons of Liberty Gun Works EX03 offers a reliable, duty-grade rifle, with only the essential features needed in a fighting rifle. Like all SOLGW rifles, the EX03 reflects an attention to detail in material selection, part construction and build quality that is second to none. The result is a rifle that delivers exceptional shootability and unmatched dependability, whether on the job, at the range, or in defense of the home.

EX03 11.5" SBR Shown

INTERMEDIATE BUFFER SYSTEM

All EX03s feature an intermediate buffer system. In exchange for a slightly longer buffer tube, the rifle operates with a rifle spring and extended buffer, which lengthens the recoil cycle. This reduces bolt speed, smooths the recoil impulse, and improves reliability across a wider range of ammunition, conditions and when using a suppressor.

B5 FURNITURE

All EX03s are standard with B5 pistol grips and B5 Bravo riflestocks. Pistol variants ship with SB Tactical SBA5 brace.

LIBERTY FIGHTING TRIGGER

The LFT is a high quality, ultra reliable and consistent combat trigger. Where Mil-Spec triggers can vary between 6 and 9 lbs the LFT will always give a pull between 5.5 and 6 lbs. SOLGW LFT triggers are nickel-boron coated, use high quality QPQ stainless Trigger and Hammer pins, full strength Mil-Spec springs.

FORGED RECEIVERS

The upper and lower receivers are forged aluminum, offering a light, strong and durable receiver for a lifetime of use. Machined and then hand finished before anodizing, SOLGW are as aesthetically pleasing as they are functional.

LEGENDARY STRIPES BCG

The bolt carrier group is one of the essential components to the performance of a fighting rifle. We put more attention into just the BCG than most companies do to the entire rifle.

All SOLGW BCGs are test-fired on machine guns for QA testing, BEFORE going into rifles or sold as loose components.

LIBERTY FIGHTING BARREL

The Liberty Fighting Barrel is a 5R rifled, 41v50 chrome moly barrel that is phosphate treated and chrome lined. The barrel contour matches that of the SOLGW MK1, providing a balance of handling and rigidity, even when attaching a suppressor. Featuring a .223 Wylde chamber and a 1:7 twist with a DLC coated barrel extension, the Liberty Fighting Barrels is a durable barrel that offers improved accuracy and handling for your rifle. Available in 11.5", 14.5", and 16" lengths.

7-SIDED M-LOK HANDGUARD

The EX03 rifle incorporates the L89 handguard, which offers 7-sides of M-LOK to allow the user to customize their rifle setup to mission specific applications and/or personal preferences.

A steel MLOK QD mount is included with each EX03 rifle.

THREE POINTS OF RAIL SECURITY

With a steel barrel nut, as well as anti-rotation tabs against the upper receiver and additional stainless-steel pin between the upper and rail, the EX03 provides for a secure attachment that minimizes rail flex and maximizes performance.

UNLIMITED LIFETIME WARRANTY

Sons of Liberty Gun Works firearms and parts are backed by our unlimited lifetime warranty. If it breaks, we fix it—no questions asked. If you wear it out, we'll also fix it or replace it. This warranty covers all parts and craftsmanship for the life of the firearm or part, regardless of ownership.

We stand behind our work, for life.

CUSTOM BUILT

The EX03 family of rifles can be customized to suit personal, unit or agency preferences. From simply changing the stock to custom camouflage, select-fire and packaged options including lights, suppressors and optics, let SOLGW build the EX03 for you!
