

L89 FIGHTING RIFLE

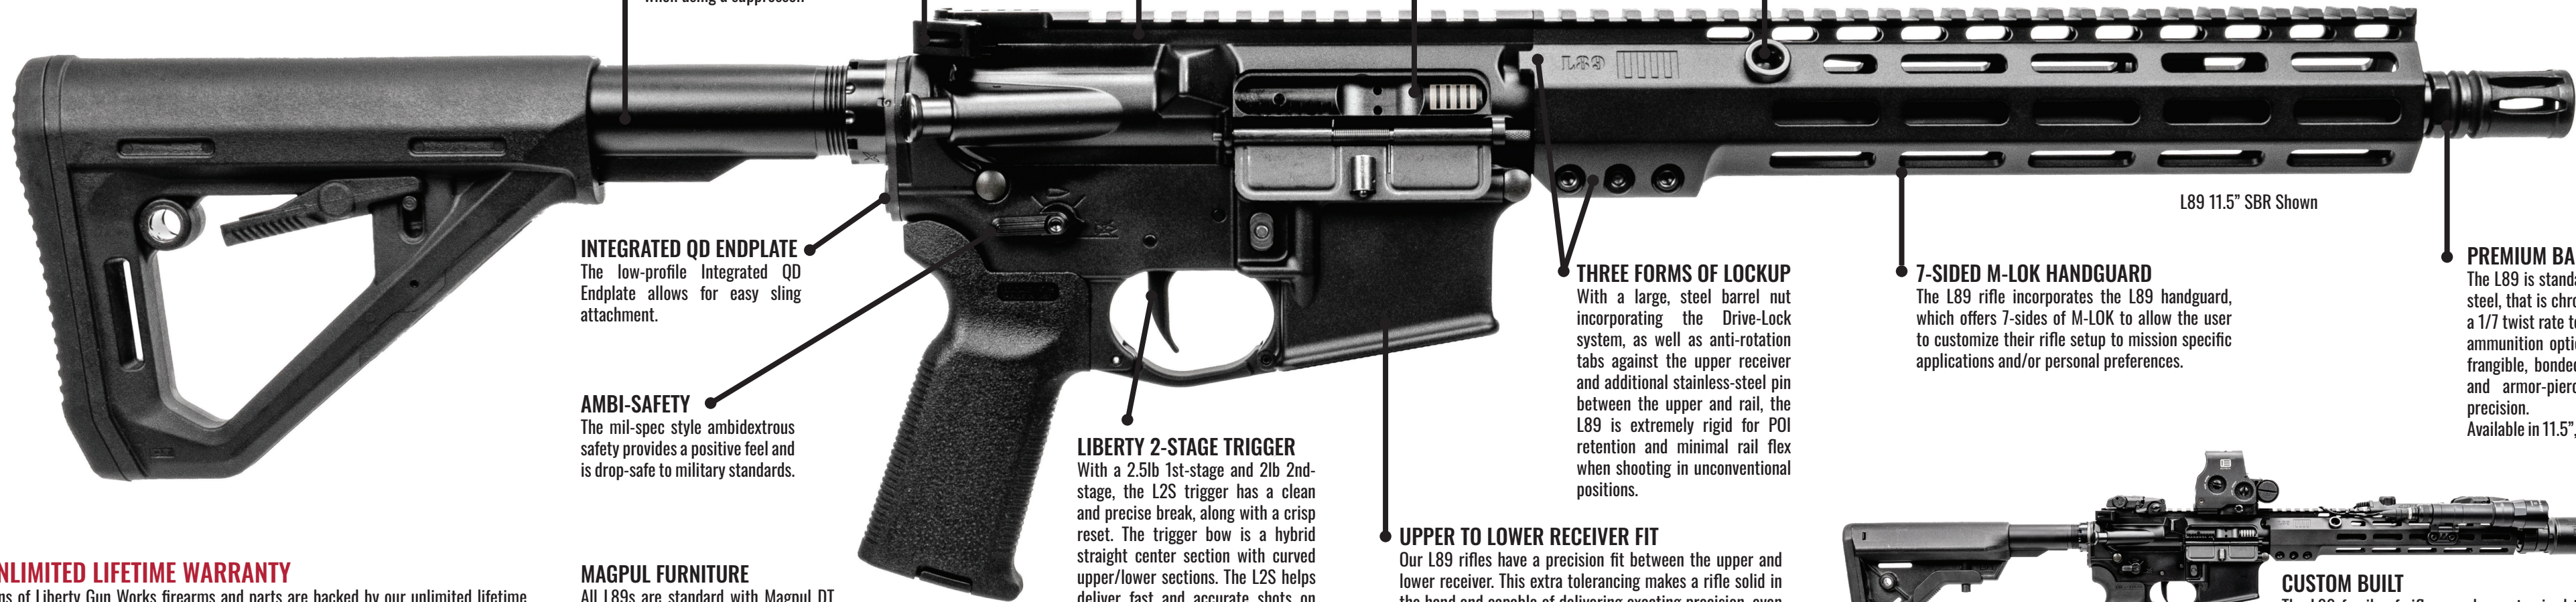

BY SONS OF LIBERTY GUN WORKS

DUTY, DEFENSE & SHOOTER READY

L89 FIGHTING RIFLE

The SOLGW L89 is built to be a fighting rifle, crafted with unyielding standards, top-tier materials, and meticulous attention to detail. Each rifle is hand-built by seasoned professionals and patriots, ensuring its mission-ready right out of the box. Backed by a lifetime warranty that even covers wear from use, the L89 delivers performance on demand, every time.

UNLIMITED LIFETIME WARRANTY

Sons of Liberty Gun Works firearms and parts are backed by our unlimited lifetime warranty. If it breaks, we fix it—no questions asked. If you wear it out, we'll also fix it or replace it. This warranty covers all parts and craftsmanship for the life of the firearm or part, regardless of ownership. We stand behind our work, for life.

MAGPUL FURNITURE

All L89s are standard with Magpul DT riflestocks, as well as MOE K2 pistol grips. Pistol variants ship with SB Tactical SBA5 brace.

AMBI-SAFETY

The mil-spec style ambidextrous safety provides a positive feel and is drop-safe to military standards.

INTEGRATED QD ENDPLATE

The low-profile Integrated QD Endplate allows for easy sling attachment.

INTERMEDIATE BUFFER SYSTEM

All L89s feature an intermediate buffer system. In exchange for a slightly longer buffer tube, the rifle operates with a rifle spring and extended buffer, which lengthens the recoil cycle. This reduces bolt speed, smooths the recoil impulse, and improves reliability across a wider range of ammunition, conditions and when using a suppressor.

LIBERTY CHARGING HANDLE

The SOLGW Liberty Charging Handle is an ambidextrous offering allowing easy cycling from either shoulder.

FORGED RECEIVERS

The upper and lower receivers are forged aluminum, offering a light, strong and durable receiver for a lifetime of use. Machined and then hand finished before anodizing, SOLGW are as aesthetically pleasing as they are functional.

LIBERTY 2-STAGE TRIGGER

With a 2.5lb 1st-stage and 2lb 2nd-stage, the L2S trigger has a clean and precise break, along with a crisp reset. The trigger bow is a hybrid straight center section with curved upper/lower sections. The L2S helps deliver fast and accurate shots on target.

LEGENDARY STRIPES BCG

The bolt carrier group is one of the essential components to the performance of a fighting rifle. We put more attention into just the BCG than most companies do to the entire rifle.

All SOLGW BCGs are test-fired on machine guns for QA testing, BEFORE going into rifles or sold as loose components.

UPPER TO LOWER RECEIVER FIT

Our L89 rifles have a precision fit between the upper and lower receiver. This extra tolerancing makes a rifle solid in the hand and capable of delivering exacting precision, even for a CQB style carbine.

THREE FORMS OF LOCKUP

With a large, steel barrel nut incorporating the Drive-Lock system, as well as anti-rotation tabs against the upper receiver and additional stainless-steel pin between the upper and rail, the L89 is extremely rigid for POI retention and minimal rail flex when shooting in unconventional positions.

THE CHOICE OF ARMED PROFESSIONALS & RESPONSIBLE CITIZENS

Due to the reliability, shootability and feature set, the SOLGW L89 is a popular rifle for for LE and government professionals. These same characteristics also make it our most popular rifle for armed citizens and recreational shooters.

INTEGRATED QD SWIVELS

L89 handguards feature steel quick-detach swivel mounts directly integrated with the rail at the 2 and 10 o'clock positions.

7-SIDED M-LOK HANDGUARD

The L89 rifle incorporates the L89 handguard, which offers 7-sides of M-LOK to allow the user to customize their rifle setup to mission specific applications and/or personal preferences.

PREMIUM BARRELS

The L89 is standard with a 4150-barrel steel, that is chrome-lined and features a 1/7 twist rate to stabilize nearly every ammunition option available, including frangible, bonded, solid copper, match and armor-piercing projectiles with precision. Available in 11.5", 14.5", and 16" lengths.

CUSTOM BUILT

The L89 family of rifles can be customized to suit personal, unit or agency preferences. From simply changing the stock to custom camouflage, select-fire and packaged options including lights, lasers, suppressors and optics, let SOLGW build the L89 for you!
